You have been warned. As discussed above, a variable containing a list can be used as a list variable to pass list items to a keyword as individual arguments. It is possible to import test libraries in test case filesresource files and test suite initialization files.

Oftentheerrormessageiscreatedbythekeyworditself,butsomekeywordsal creates lots of problem-solving activity in the planning stage, and much physicality and togetherness when the ring is being passed over the group. But it requires a strength of character.
